Clinical Correlations Objectives
January 2006
Administrators: Abby Ford and Eva Turek

1) **Medical Knowledge:**
   a. The 2nd year student will be able to explain the pathophysiology of atherosclerosis and how it relates to myocardial ischemia.
   b. The 2nd year student will be able to identify EKG findings indicative of myocardial ischemia.
   c. The 2nd year student will be able to formulate a differential diagnosis for cardiac and non-cardiac causes of chest pain.

2) **Patient Care:**
   a. The 2nd year student will become familiar with how a chest pain case is presented on the medical wards.
   b. The 2nd year student will be able to ask appropriate questions regarding risk factors and associated symptoms of cardiac chest pain.
   c. The 2nd year student will be able to describe the major components of the cardiac exam.

3) **Interpersonal and Communication Skills:**
   The 2nd year student will be able to identify and list effective listening, narrative, and nonverbal skills that were employed or absent during the patient encounter.

4) **Professionalism:**
   The 2nd year student will be able to identify ways that a clinical clerk can be considerate of the needs of patients, families, and/or colleagues.
