Practical Matters & Tips

1 Chiefs of Medicine and Chiefs of Pediatrics should be informed of planned correlation sessions, both to be aware of 3rd year medical students’ time away from their teams and to help select patients to present.

2 Contacts to help reserve rooms in the departments of pediatrics & medicine:
   Pediatrics:  Jakki Outlaw x5-8504
                Lauren x5-2934
   Medicine:   Mitra x5-2913

3 Dr. Garrett may be able to provide a second year class schedule to determine convenient dates and times for any sessions.

4 Sign-up sheets posted outside of the second year lecture hall may help ensure that the preferred number of students attend each session.

5 Messages to the 2nd year class can be easily spread via email. The class president or any class-member may forward any emails to their class listserv.

6 We should always obtain verbal permission in advance from the patient (or guardian) to bring students in to their hospital room.
